📍 Fortaleza, CE, Brazil

Summary

Backend Developer, Telecommunications Engineer (undergraduate), and Computer Networks Technician. Specialized in building high-performance software solutions, RESTful APIs, and microservices architectures. Passionate about optimizing complex systems and highly interested in applying cutting-edge technologies, such as Artificial Intelligence, to solve high-impact business challenges. Seeking a position where I can leverage my experience to contribute to an innovative, product-oriented environment.

Education

Federal Institute of Education, Science and Technology of Ceará

2020 – 2025

B.S. in Telecommunications Engineering

Ongoing

EEEP Profissional Presidente Roosevelt

2016 – 2018

Technical Degree in Computer Networks

Experience

FB Online

Jan. 2024 – Present

Backend Developer

Fortaleza, CE, Brazil

- Developed and maintained RESTful APIs and microservices architectures, focusing on scalability and low latency.
- Participated in the modernization, migration, and refactoring of services based on Ruby on Rails, Django, and NestJS, delivering performance improvements and increasing deployment agility for new features.
- Performed modeling and optimization of relational (PostgreSQL) and non-relational (MongoDB) databases, focusing on data consistency and high-performance queries.
- Collaborated on CI/CD pipeline automation, integrating automated tests to ensure code stability and quality in production.

FB Online

Jan. 2023 – Dec. 2023

Frontend Developer (Intern)

Fortaleza, CE, Brazil

- Worked directly on the development of the learning platform and internal administrative systems, creating reactive and componentized user interfaces using React/Next.js and Vue/Nuxt.js.
- Contributed to the evolution of the platform's Design System, ensuring visual consistency and component reusability across multiple projects.
- Implemented automated tests for UI components, ensuring interface quality and performance within a continuous integration environment.

Mob Telecom

Sep. 2021 – Mar. 2022

Intern - Telecommunications Projects

Fortaleza, CE, Brazil

- Worked on optical network engineering projects, including planning for BACKBONE and FTTH topologies.
- Developed scripts to automate the import and processing of geospatial data (KML, DWG) for network expansion feasibility analysis.

Wirelink Telecom

Aug. 2020 – Sep. 2021

Intern - Telecommunications Projects

Fortaleza, CE, Brazil

- Utilized Network Inventory Management platforms to maintain the registry and documentation of network assets.
- Performed technical drawing and documentation for FTTX network projects, detailing optical infrastructure topology.

Maresia - Sand Beach Indústria

Feb. 2019 – May 2020

IT Support & Helpdesk

Fortaleza, CE, Brazil

- Provided L1/L2 technical support for hardware and software incidents and managed the IT asset lifecycle.
- Responsible for OS administration, software provisioning, and direct user support to ensure operational continuity.

Technical Skills

Backend: Ruby on Rails, Python (Django/Flask), TypeScript (NestJS), Node.js/Express.js

Frontend: Vue.js/Nuxt.js, React.js/Next.js, TypeScript, JavaScript, HTML/CSS

Databases: PostgreSQL, MongoDB, Redis, GraphQL, Supabase

DevOps: Docker, Git/GitHub, CI/CD (GitHub Actions), Vercel, Heroku

Telecommunications: FTTX Networks, SWAP, BACKBONE, FTTH, DWDM Systems, OZmap, ConnectMaster

Projects

Palantir | *Ruby on Rails*

Continuous

- Core engine for the entire platform, managing student, teacher, and coordinator data.
- Developed with a monolithic architecture in Ruby on Rails, focused on robustness and scalability.

Escolas | *Python (Django)*

Continuous

- B2B platform for partner schools, allowing independent content and student management.
- Offers an administrative portal for schools to customize the student experience and track progress.
- Developed entirely in Python with the Django framework, using multi-tenant architecture.

Galadriel | *Python (Flask, Scikit-learn, Pandas)*

Continuous

- IRT (Item Response Theory) system for grade prediction and psychometric analysis of mock exams.
- Uses machine learning models for processing and calculating student performance predictions.
- Includes an admin system for managing exams, algorithms, and analytical report visualization.

ENEM Calculator | *Ruby on Rails, Vue.js/Nuxt.js, TypeScript*

2024

- Exam simulator with automatic grading and scores based on official ENEM IRT metrics.
- Detailed performance reports by field of knowledge.

Hiperlinks | *Ruby on Rails, Vue.js/Nuxt.js, TypeScript*

2024

- Short link management system with intelligent redirection.
- Automatic QR Code generation and real-time analytics.

Gandalf | *Vue.js/Nuxt.js, TypeScript*

2023

- Complete system with a modern and responsive interface for FB Online.
- Implemented a full administrative system with a RESTful API.

Saruman | *Vue.js/Nuxt.js, TypeScript*

2023

- Complete Student Environment platform (LMS - Learning Management System) for FB Online.
- Developed as a SPA (Single Page Application) consuming RESTful APIs from the Palantir ecosystem.
- Modern and responsive interface for content consumption, mock exams, and performance tracking.

Courses & Certifications

Telecommunications: LPE23 - LightPad i6400G Platform O&M (Padtec), LPT02 - Introduction to DWDM Systems (Padtec)

IT/Management: ITIL Foundation V3 (PMG Academy), IT Management Fundamentals (FGV)

Programming: Advanced SQL (Softblue), Programming Logic (SENAI), Learning to Program (SOFTEX)

Networking: Network Fundamentals (SOFTEX), Introduction to Computer Networks (Bradesco Foundation)

Research: Research Methodology and Scientific Initiation Project Guidance (FEBRACE)
